---

## EXPERIENCE

**OppenheimerFunds, Inc. (Invesco)**                                          **6/2018 - 10/2019**
**Assoc. Solutions Engineer**
Full-Stack Agile Development, supporting Sales-Distribution CRM: JavaScript, HTML/CSS, Salesforce Apex

- Designed and developed dozens of components, such as a Lead Score component that takes in pre-processed data and outputs the optimal methods for converting a lead through the sales pipeline.
- Developed and unit tested an Actionable Leads page that queries and displays client data for a given Financial Advisor's region, as well as the tools to manipulate that data and carry out next steps.
- Led an overhaul of the team's DevOps process by teaching consultants new continuous deployment tools, and by focusing on smaller iterations to deliver code faster and shorten feedback loops.
- Cleaned and imported over 3 million records with a 98% success rate into the OppenheimerFunds' CRM as part of the Invesco acquisition and subsequent decommissioning of Invesco's older CRM.
- Configured and trained users in several API plugins, such as ForgeRock SSO and an integrated outreach tool that automatically fetches data when a client creates meetings on an advisor's calendar.
- Held a leadership role by heading daily Agile standups, creating presentations for interns, speaking at Toastmasters International, and leading interviews for new-hires and for user-design (UCD) sessions.

**StoryCorps, Inc.**                                                          **6/2016 - 1/2017**
**Web Engineer, Intern**
Front-End Agile Development, for multiple web-based projects: JavaScript, HTML/CSS, WordPress

- Developed the UI/UX for a re-designed Webby Award honored website (*storycorps.org*).
- Designed and launched a social media platform (*archive.storycorps.org*) with over 172,000 posts.
- Constructed bug reports for a TED Prize winning, Webby Award nominated mobile app.

---

## PROJECTS

- **BrianLandvogt.com** - React PWA with perfect Performance and SEO ratings on Google Lighthouse.
- **Binder (2017) -** Developed the UI and business strategy for a P2P marketplace app that cut textbook costs for students by up to 36% (3rd in NY State Regional Business Plan Competition).
- **Wi-Move (2016) -** Designed the UI for a proposed Wi-Fi mesh-network to gamify the promotion of small businesses and expand data coverage (1st in Brooklyn BE.INnovative Hackathon).

---

## EDUCATION

**Long Island University**                                          **Brooklyn, NY | 9/2014 - 12/2017**
- Bachelor of Science in Computer Science, with Honors (3.7/4.0 GPA)
- Texas A&M Information Security Certification (ID: #500132)
