FULL-STACK ENGINEER

Mid-Level Software Engineer experienced in Webby Award nominated UX design, cloud computing at a Fortune 100, and advanced DevOps techniques used to accelerate software delivery time 50% team-wide.

CORE SKILLS

Front-End: JavaScript, HTML, CSS/SASS, Bootstrap, jQuery, TypeScript **| React:** Redux, Router, Jest, JSX
Back-End: Java, Python **| Other:** Webpack, Babel, Git, GraphQL, Node, Express, SQL, Ajax, REST, MVC
Salesforce: Aura Lightning, Web Components, Visualforce, Apex **| Methodology:** Agile, DevOps, Lean Dev

EXPERIENCE

OppenheimerFunds, Inc. (Invesco)   **6/2018 - Present**
Assoc. Solutions Engineer
Architected and developed user-driven software to boost the effectiveness of sales distribution teams. Initiated and led an overhaul of DevOps processes to tighten feedback loops and deliver value twice as fast.

- Increased sales effectiveness by designing the UI/UX for a lead-scoring system that dynamically rates the probability of client conversion and the optimal tactics to complete sales funnels.
- Decreased development lead time by 50% (from 2 weeks, to 1 week) by focusing on smaller iterations to deliver faster value to users, quicker feedback, and reduce contention of resources.
- Successfully merged CRM systems by cleaning/importing over 3 million records with a 98% success rate and refactoring thousands of legacy code lines to support ES6 and current code standards.
- Boosted user efficiency by implementing a client scheduling tool, allowing top financial advisors to directly view the itinerary of a desired consultant and book a meeting time.
- Spearheaded redesign of entire SalesForce CRM system to utilize modern, reactive design principles, using test-driven development and component-driven architecture.
- Defined a leadership role by heading daily stand-ups, conducting technical interviews for new hires, speaking at Toastmasters International, presenting to interns, and administering user training.

StoryCorps, Inc.   **6/2016 - 1/2017**
Web Engineer Intern
Developed front and back-end code for multiple award-winning, web-based projects. Led weekly scrum meetings and provided input to key UX decisions.

- Engineered the UI/UX for a re-designed Webby Award honored website (*storycorps.org*).
- Designed and launched a social media platform (*archive.storycorps.org*) with over 172,000 posts.
- Constructed bug reports for a TED Prize winning, Webby Award nominated mobile application.

PROJECTS

- **BrianLandvogt.com (2018)** - Designed and developed with the latest React.js and Node.js features
- **Founder of Binder (2017) -** Designed a Java-based P2P marketplace app that cut textbook costs for students by up to 36% (3rd in the NY State Regional Business Plan Competition).
- **Co-Founder of Wi-Move (2016) -** Proposed an open Wi-Fi mesh-network to gamify the promotion of small businesses and expand coverage (1st in Brooklyn BE.INnovative Hackathon).

EDUCATION

Long Island University   **Brooklyn, NY | 9/2014 - 12/2017**
- Bachelor of Science in Computer Science, with Honors (3.7/4.0 GPA)
- Texas A&M Information Security Certification (ID: #500132)
